SPALDING

A Questor Company

Spalding 1975 Golf Professional Catalog

effective September 1, 1974

The Spalding tradition is quality.

The first golf club ever made in this country was made by Spalding. That was in 1894. Four years later, Spalding produced the first golf ball ever made here. Those years were the beginnings of a great golf tradition. Spalding.

No pro golfer stays at the top very long on the tour, yet Spalding has been up there year after year, since the beginning. But then, Spalding is the name of the game.

Spalding innovations keep setting the pace. The Top-Flite golf ball set off a flurry of copies. And in the final analysis, Spalding's two-piece construction is still the longest ball. Innovations, too, in club design such as the development of a truly larger sweet spot, keep Spalding at the top of the golfing world.

That's why Spalding continues to be a leader in pro golf. Innovation. Foresight. Developing products that shape the future of the game. Carrying on the Spalding tradition. Quality.

Spalding Statement of Policy Professional Golf

Spalding will offer for sale its professional line of golf equipment to an individual or establishment who owns, operates or manages an outdoor golf playing facility.

An outdoor golf playing facility is described as a regulation golf course, an executive golf course, a par three golf course or a driving range.

It is understood that recommendations for appointments be made by our sales representatives under the terms and conditions as stated above. It is required that a prospective professional golf account place an initial order equivalent to $500.00 worth of Spalding professional golf equipment at his cost. It is also understood that all orders will be accepted on the basis that the prospective account will be able to meet his financial obligations. This will be determined by Spalding's headquarters. Final approval must come from the Director, Professional Sales.

Guarantee and repair procedure for Spalding products

Spalding products are guaranteed for one year against defect in workmanship and material. Spalding reserves the right to inspect returned merchandise for evidence of misuse and to determine whether repair, replacement or adjustment is due.

A nominal fee, plus postage, will be charged to repair and put back into good playing condition any repairable Spalding product which is damaged in play. Customers may return merchandise to be repaired to their nearest golf professional.

golf balls

Top-Flite

The longest ball

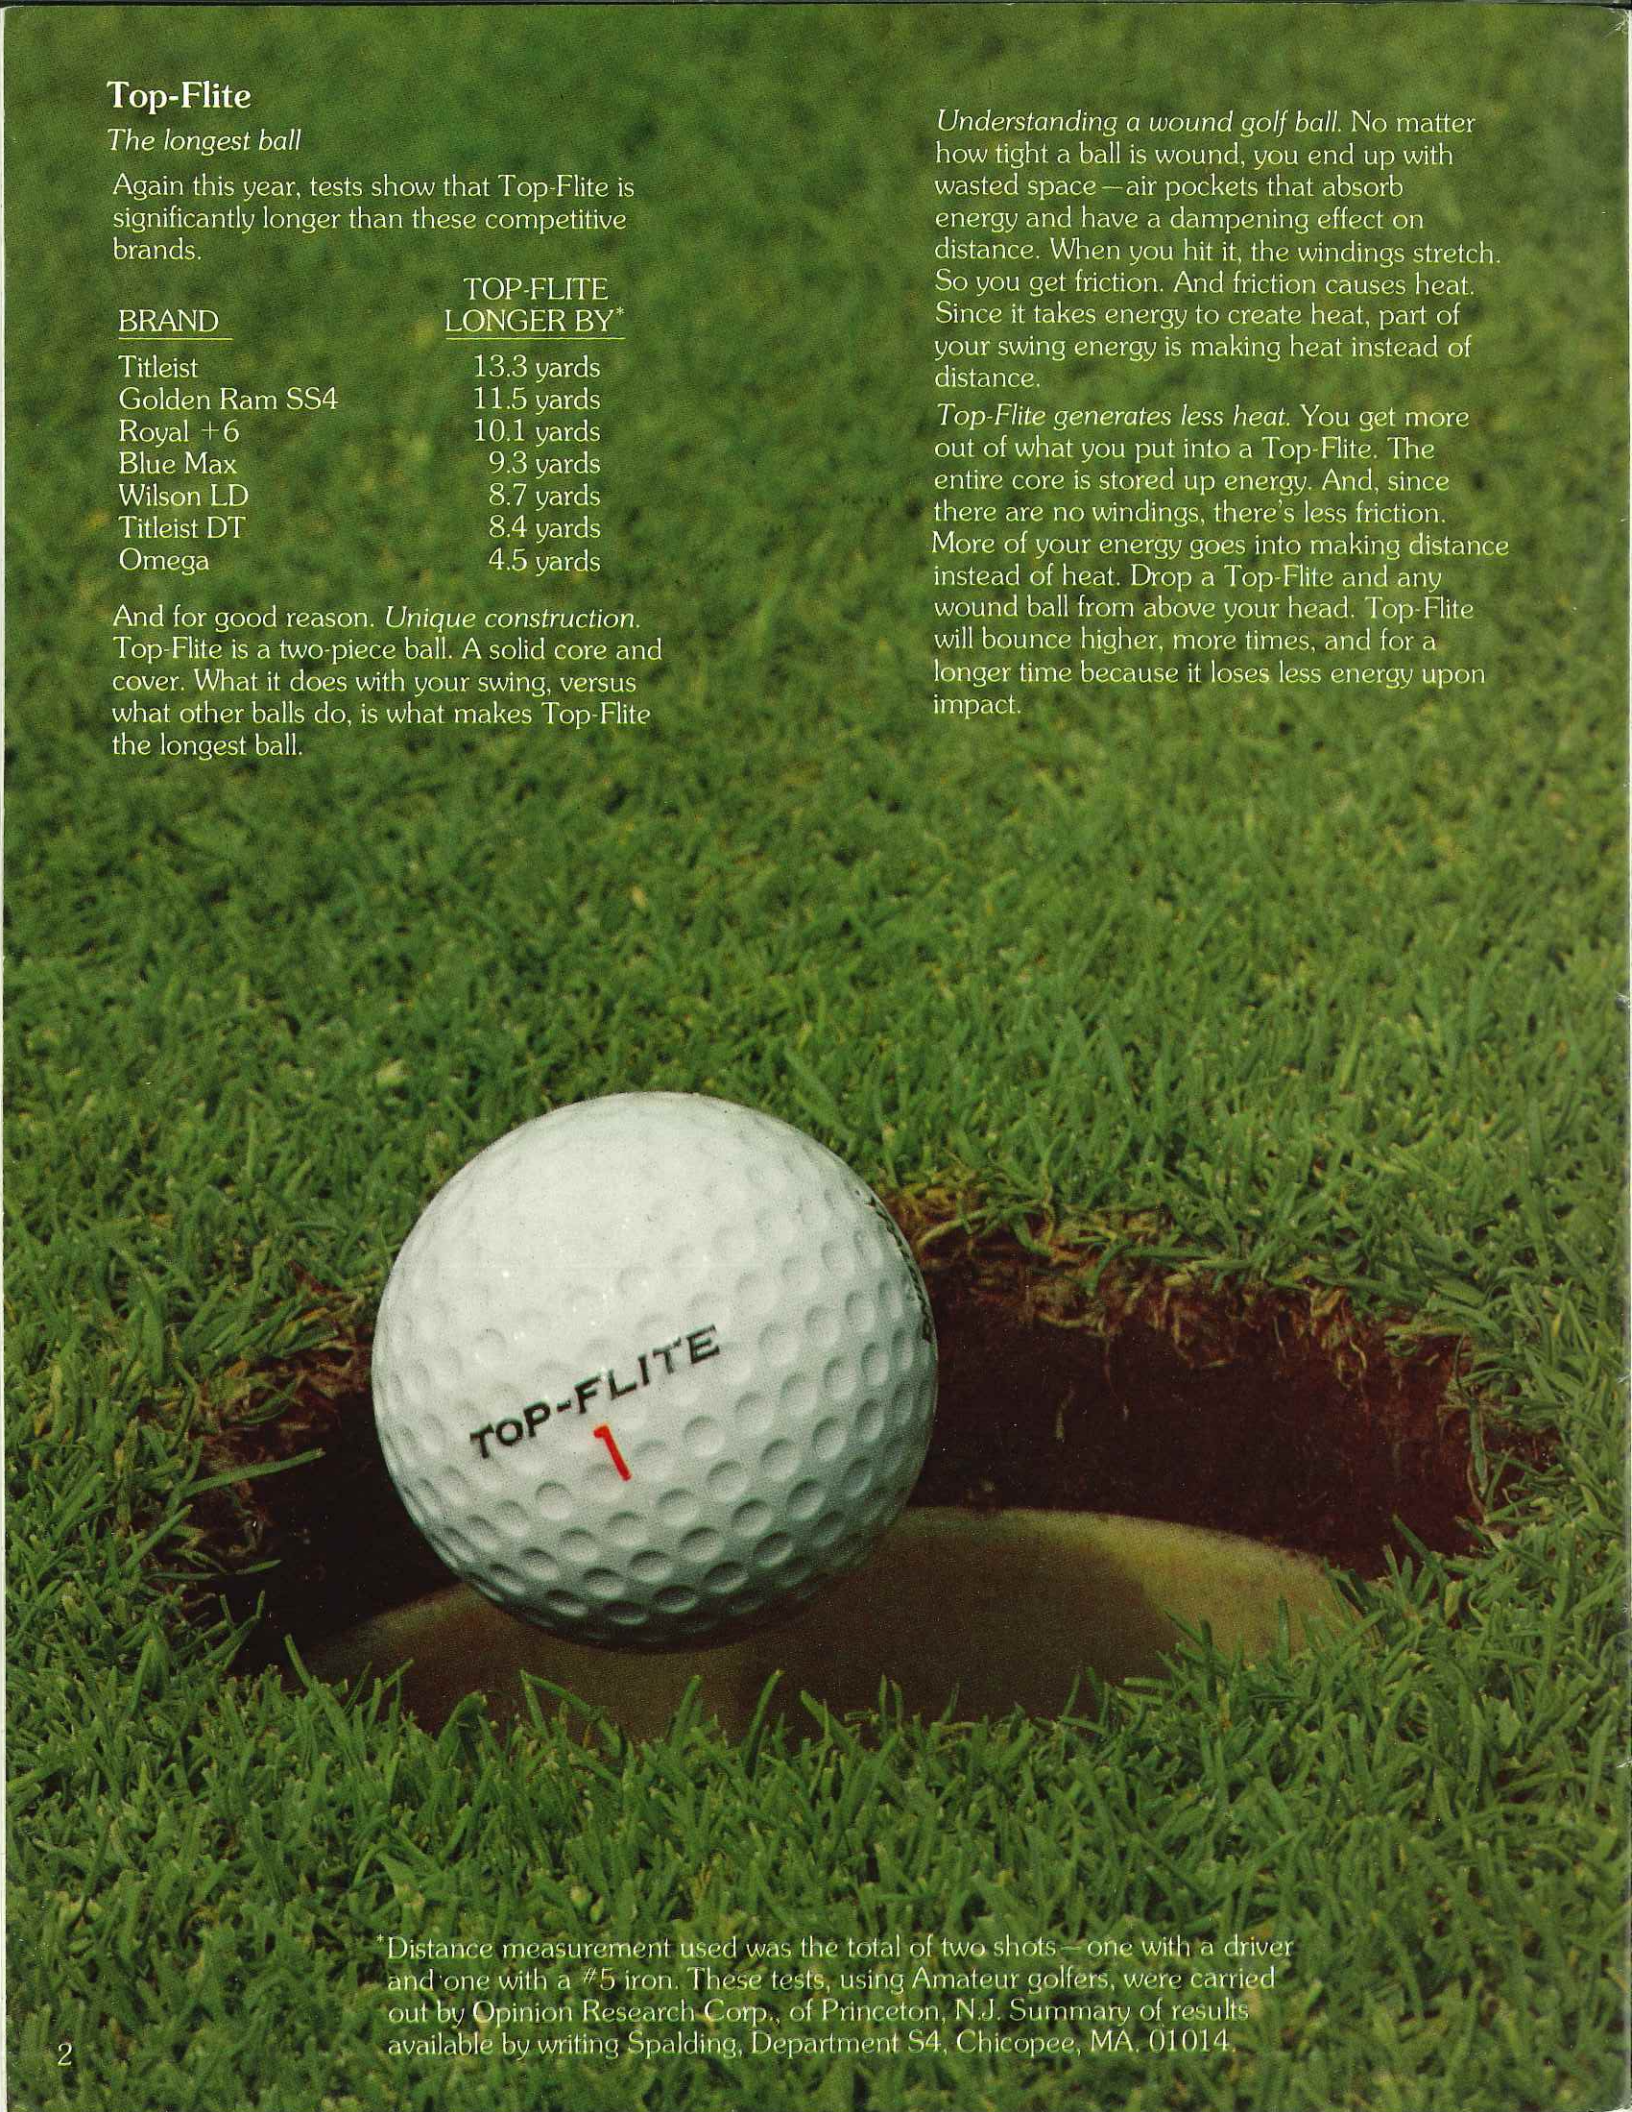
Again this year, tests show that Top-Flite is significantly longer than these competitive brands.

BRAND	TOP-FLITE LONGER BY*
Titleist	13.3 yards
Golden Ram SS4	11.5 yards
Royal +6	10.1 yards
Blue Max	9.3 yards
Wilson LD	8.7 yards
Titleist DT	8.4 yards
Omega	4.5 yards

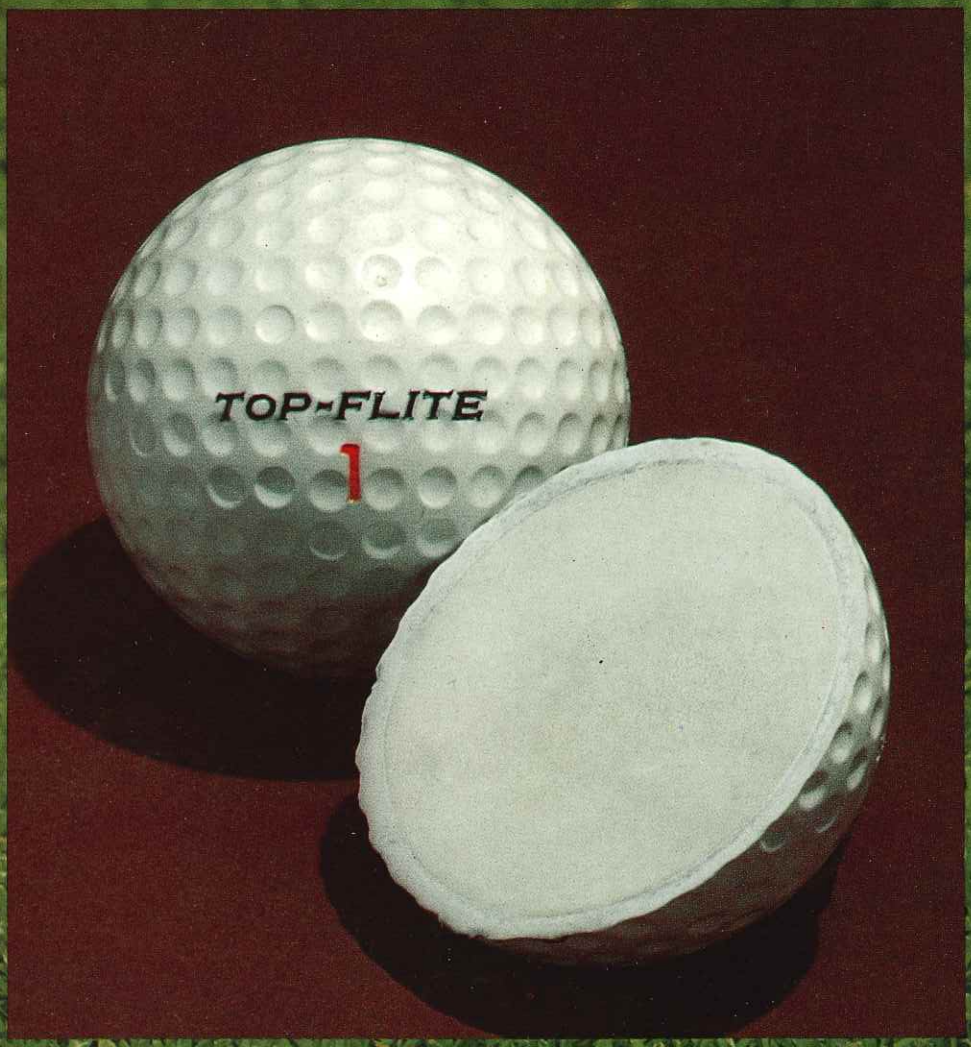
And for good reason. *Unique construction.* Top-Flite is a two-piece ball. A solid core and cover. What it does with your swing, versus what other balls do, is what makes Top-Flite the longest ball.

Understanding a wound golf ball. No matter how tight a ball is wound, you end up with wasted space—air pockets that absorb energy and have a dampening effect on distance. When you hit it, the windings stretch. So you get friction. And friction causes heat. Since it takes energy to create heat, part of your swing energy is making heat instead of distance.

Top-Flite generates less heat. You get more out of what you put into a Top-Flite. The entire core is stored up energy. And, since there are no windings, there's less friction. More of your energy goes into making distance instead of heat. Drop a Top-Flite and any wound ball from above your head. Top-Flite will bounce higher, more times, and for a longer time because it loses less energy upon impact.



*Distance measurement used was the total of two shots—one with a driver and one with a #5 iron. These tests, using Amateur golfers, were carried out by Opinion Research Corp., of Princeton, N.J. Summary of results available by writing Spalding, Department S4, Chicopee, MA. 01014.



The principal of radius of gyration. Wound balls are heavier in the center. Top-Flite's unique two-piece construction puts more weight to the outside. The result is a more ideal radius of gyration. It has to do with spin and centrifugal force. What it means is Top-Flite even gets more distance from its own momentum.

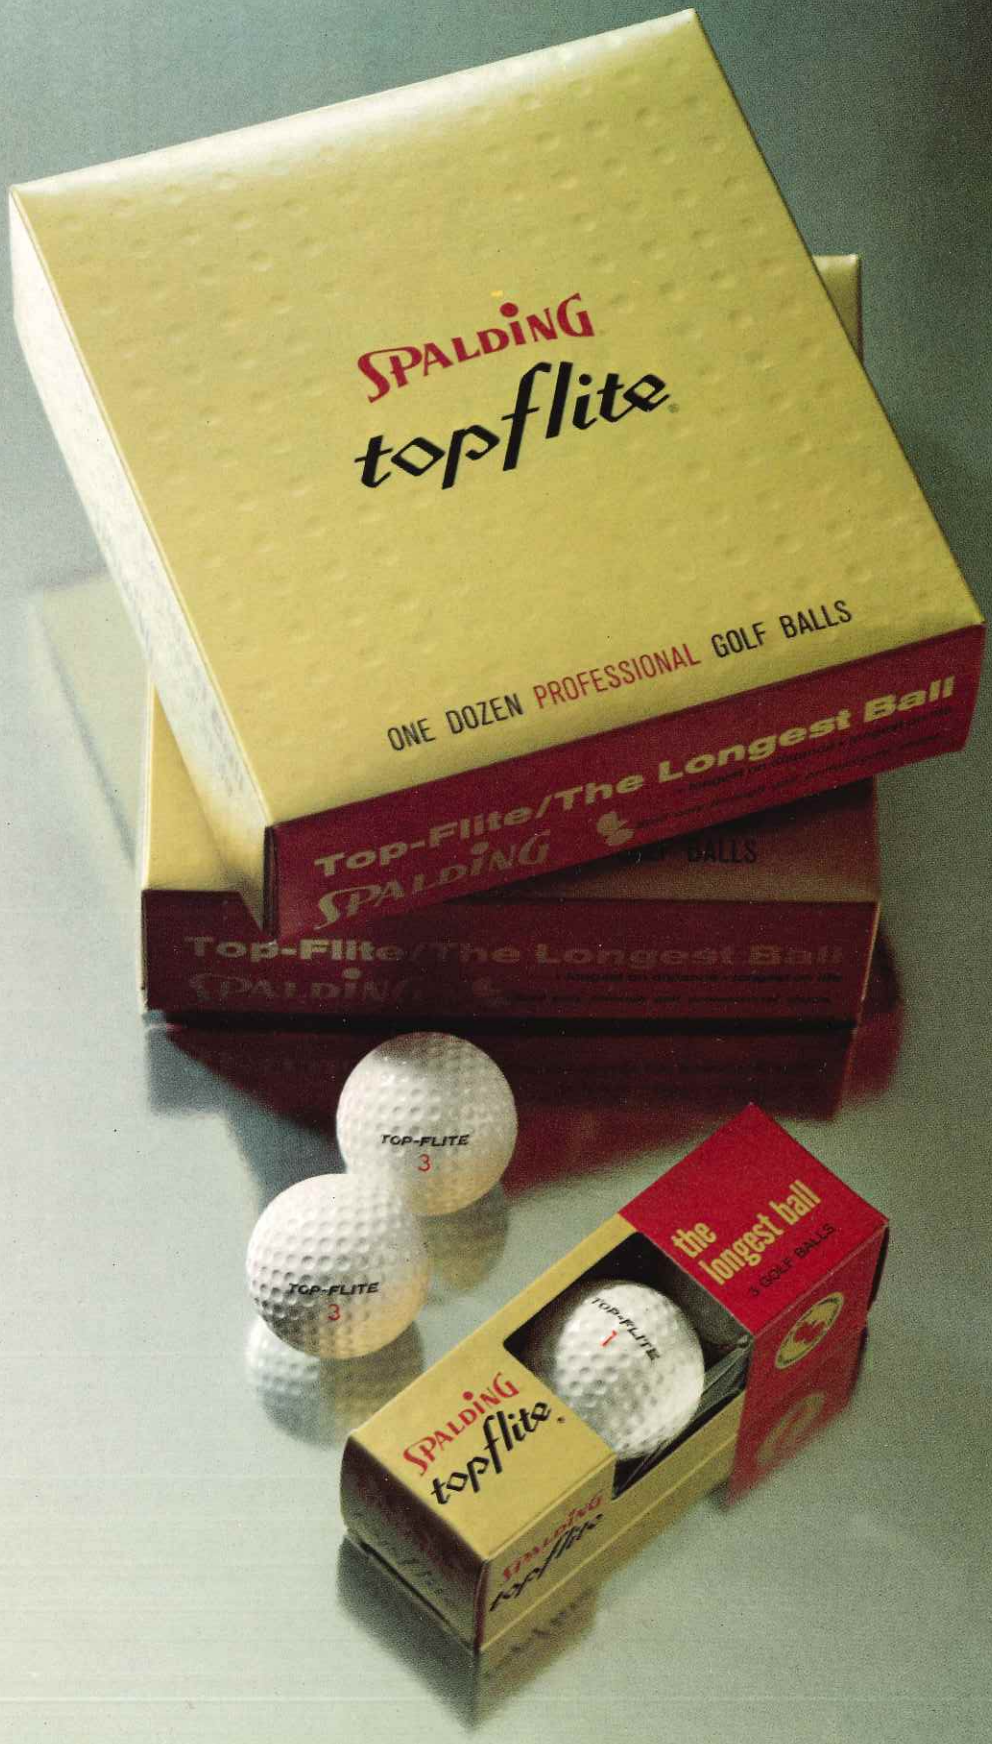
As if being the longest ball weren't enough! Top-Flite is also the most durable ball you can play. Another independently conducted test bears it out. In a durability test, Top-Flite outlasted them all again. By at least twice as many hits.

Once again, the reason is Top-Flite's unique construction. Top-Flite's cover is super tough Gyrolon™, an exclusive Spalding blend of Dupont Surlyn®. Other balls just can't take the beating Top-Flite can. Which means golf's longest ball is also its toughest. Spalding Top-Flite.

Top-Flite 11-156

Personalizing

On an order of one dozen or more Top-Flite golf balls, the golfer's name will be imprinted in block or script lettering at 50¢ per dozen service charge.



Dot

the premier ball

The "click and feel" of success. It's the famous Spalding Dot, with tough surlyn® cover for extra distance and durability.

Distance, consistency, accuracy. That's what makes the Spalding Dot the choice of pros and low handicappers alike, year after year. Spalding Dot. Golf's premier ball.

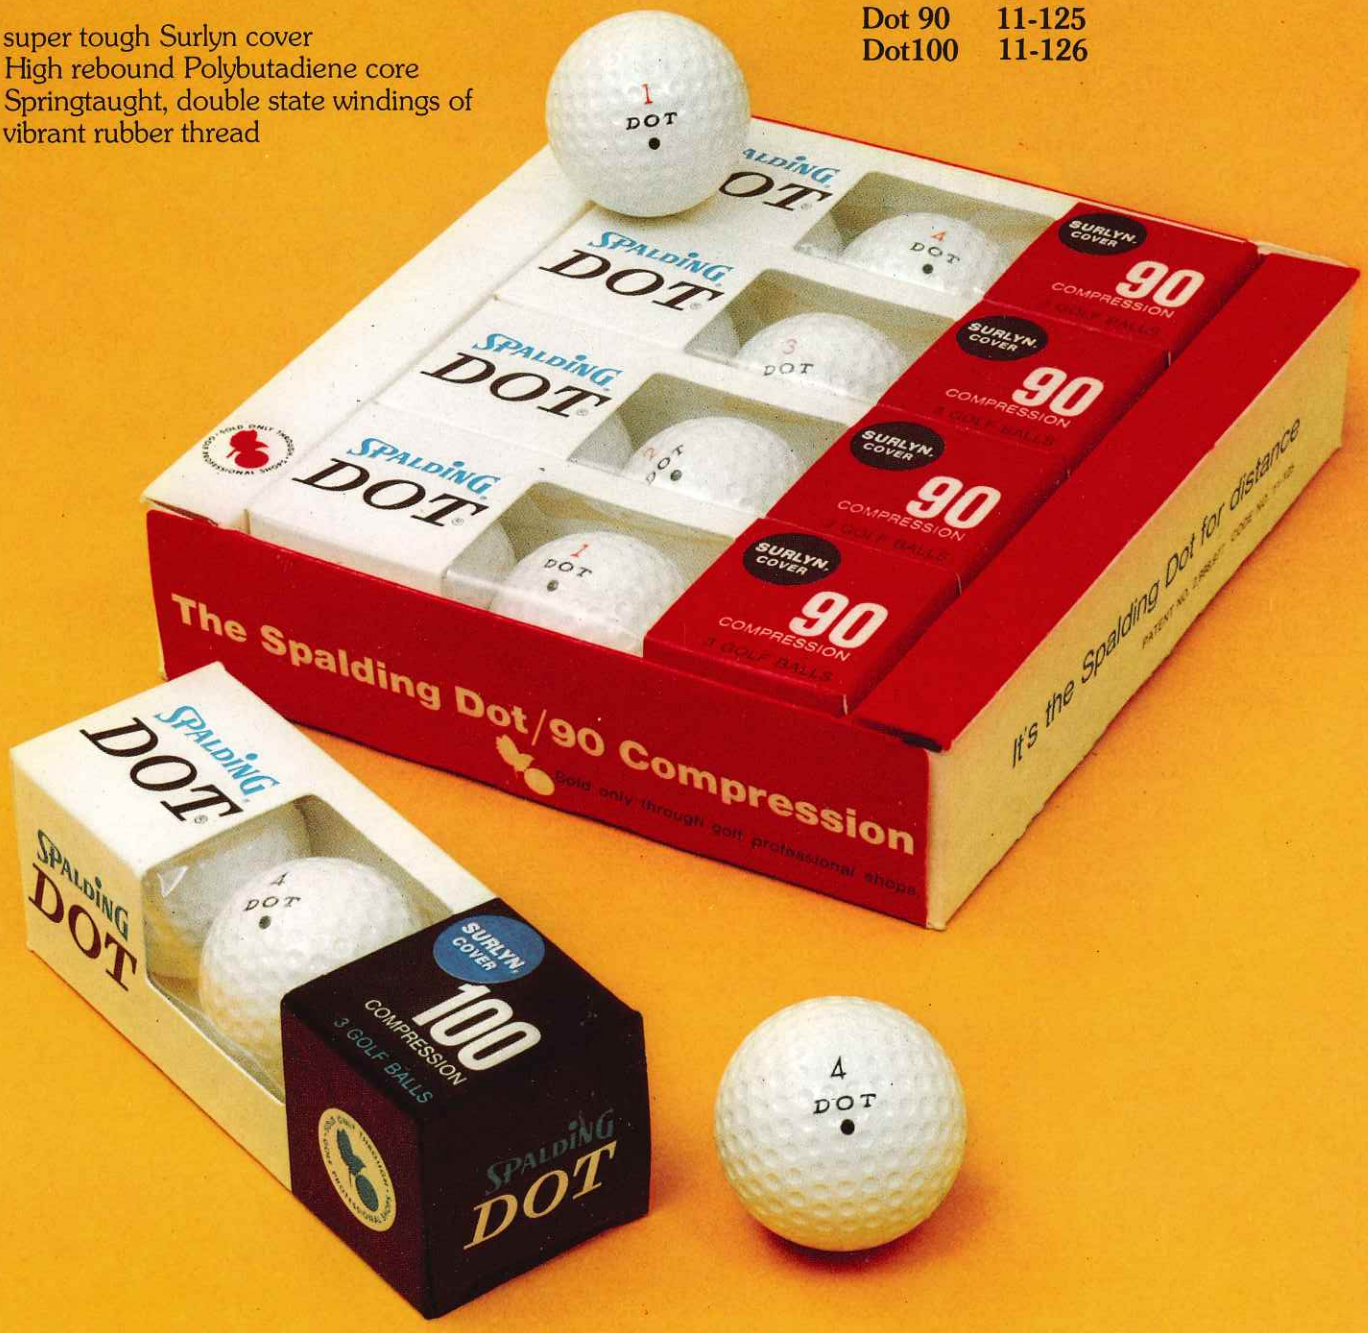
- super tough Surlyn cover
- High rebound Polybutadiene core
- Springtaught, double state windings of vibrant rubber thread

Spalding Dot "90" The premier ball for most golfers.
Spalding Dot "100" The premier ball for extra hard hitters.

Personalizing

On an order of one dozen or more Dot Golf Balls, the golfer's name will be imprinted in block or script lettering at 50¢ per dozen service charge.

Dot 90 11-125
Dot100 11-126



Pro-Flite

the value ball

The most ball for your money. Two-piece construction gives Pro-Flite extra distance off the tee and off the irons. An invincible cover means Pro-Flite can take the worst hits without cracking a smile. Spalding Pro-Flite. The most ball for the money in the pro shop.

Pro-Flite 11-175

custom clubs and balls

Custom Built Clubs

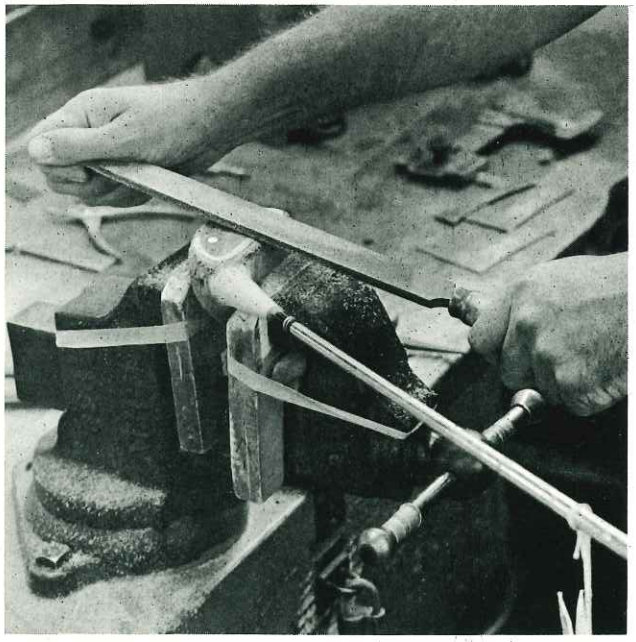
A touch of class

Professional or amateur, no two golfers are alike in physical features or individual needs. While it is true that most players can be fitted with standard Spalding clubs from regular pro shop stock, there are many who need custom built clubs if they are ever to reach their full potential in the game.

Above and beyond the physical need, there is also a widely felt psychological need for custom built clubs. Golf is the world's number one prestige game. It has an unmistakable air of sophistication about it. All golfers feel it. And in golf, custom built clubs represent the epitome of class.

Spalding has been custom making golf clubs longer than anybody else. Therefore, you may choose from the almost infinite number of variations our Custom Built Department has perfected over the years. Here are the features that can be adjusted. Study them. Decide exactly what you want. Then, place your order to have your clubs handcrafted by our Spalding experts to your precise specifications:

- Head shapes on woods and irons
- Lie and loft
- Swing weights, total weights
- Shaft pattern, flex and length
- Grip material and style



Special Order Clubs

Perhaps your requirements can be filled by only slightly modifying a regularly stocked set of Spalding clubs. A little more shaft flex. An in-between length. A different style of grip. If that's the case, you may not have to go all the way to Custom Built clubs. Spalding's Special Order clubs will give you just the set of clubs you're looking for.

Custom Built or Special Order, when you choose Spalding, you're getting more than just a specially designed set of golf clubs. You're getting a tradition of craftsmanship. You're getting Spalding—the finest custom made golf clubs in the world.

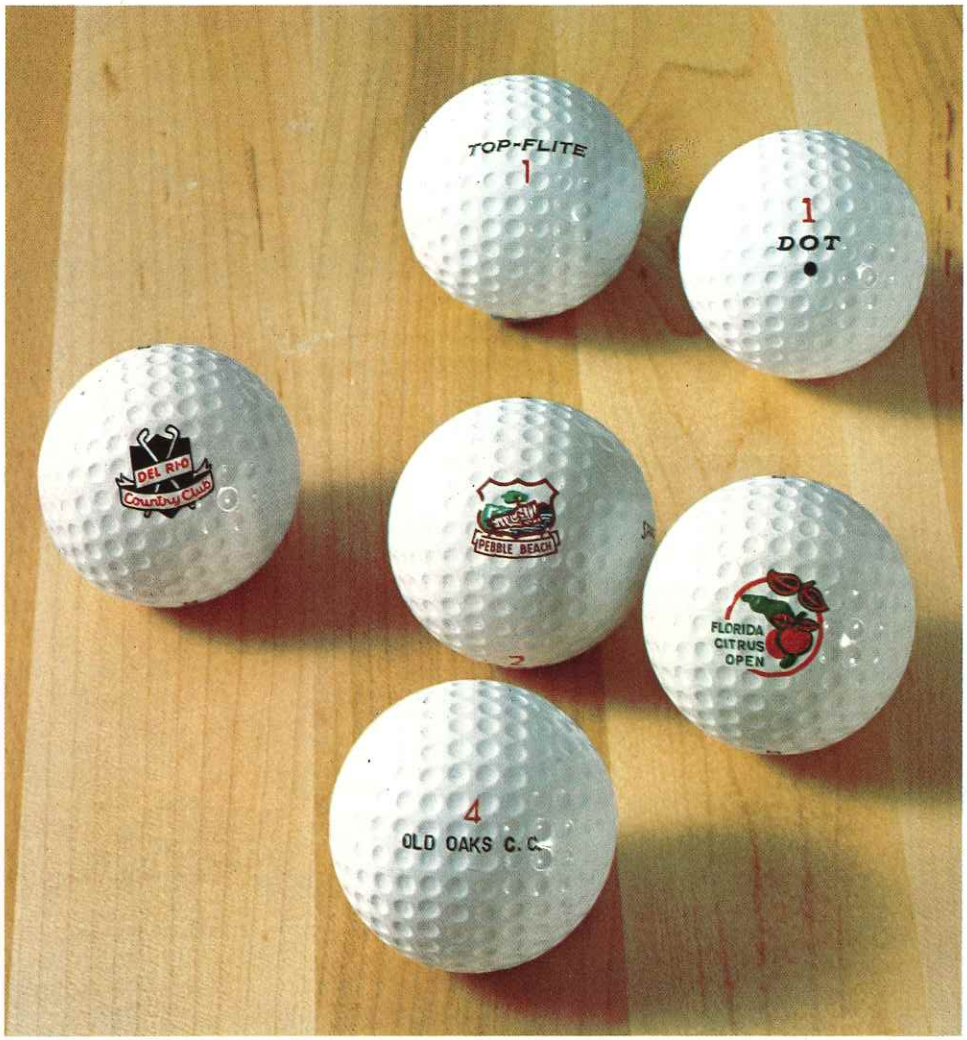
Custom logo program

The personal touch

Custom made clubs are one thing. A custom logo goes one step further. It personalizes custom built clubs to give them a one-of-a-kind exclusivity. In other words, a custom logo gives your clubs your personal touch.
This year, as in the past, Spalding will custom imprint your custom made clubs with your country club logo, and your name and/or club name, when you order five sets or more. Spalding custom made, custom logo clubs are a realistic possibility for everybody who wants them.

Custom ball imprinting

Custom Logo Program



Make the right impression on members and visitors alike with these colorful goodwill builders from Spalding. Imprint them with your country club logo. Choose the famous Dot. Or Top-Flite, the longest ball. Your tournament or club deserves to be remembered. So don't let them forget! Send them away with custom imprinted balls by Spalding. It's a great way to make friends.

golf clubs

Elite Centurion

The culmination of nearly 100 years of clubmaking.

Elite Centurion. The finest golfing instruments ever created by the most experienced clubmakers in the game—Spalding.

Elite Centurion brings together performance-proven club characteristics, the most modern design and production technologies, plus, the distinct mark of craftsmanship at its best.

Confidence in play. Pride in appearance. Simply stated, these are the most playable clubs the game has ever produced. More than clubs, Elite Centurion is an approach to the game.

Woods

- Wood heads designed for, and proven in play by Spalding's Touring Professional Advisory Staff.
- The medium-deep faced driver delivers consistently straighter hits (15" radius roll, 10" radius bulge). Shallow faced fairway woods. Precision swing weighted. Precision total weighted.
- Increased mass behind the hitting area achieved through a unique brass back-weighting system. The final touch is a Black Caramel finish, hand rubbed to perfection.

Irons

- Radiused and cambered sole greatly reduces turf drag. Short hosel allows additional mass to be placed more effectively in the blade. Tapered brass ferrule smooths transition from shaft to hosel.
- Blade is slightly offset to encourage proper hands-ahead action at impact. Thin, clean top line.
- Investment cast irons with playability-proven lower concentration of mass. Dynamic® or lightweight steel shafts.

- Leather grips available through Spalding's Custom Built Department.
- Sold only through Golf Professional Shops.

Note: Lightweight steel shafts will not be available until approximately January 1, 1975. Contact local Spalding Professional Sales Representative for availability information.

Top-Flite

built-in shot control

First, there was heel and toe weighting—a Spalding innovation in 1967. Now, there is 3-point Dy-Nertial weighting—only in Spalding's Top-Flite clubs. For the first time, a low center of gravity is combined with heel and toe weighting to create the biggest sweet spot ever. Not just in the irons, but for the first time, in the woods, too.

With Top-Flite, you get results from hits not only toward the heel or toward the toe. You also get results with those "thin" hits, thanks to the lower center of gravity. Top-Flite's Dy-Nertial weighting surrounds the ball with balanced weight at impact, providing longer flight and more ball control.

Spalding Top-Flite. The most built-in shot control any clubs ever had. In both woods and irons.

Woods

- new laminated maple woodblock for greater strength and durability
- 3-point Dy-Nertial weighting in heel, toe and sole
- oversized Cycolac® face insert for larger, more uniform hitting area
- black high-gloss polyurethane finish

Irons

- 3-point Dy-Nertial weighting in heel, toe and sole
- square toe aids ball alignment
- short hosel gives improved weight distribution
- thin top line
- compact, perma-finish tempered steel heads, chrome plated and hand polished

* Leather grips available through Spalding's Custom Built Department.

* Sold only through golf professional shops.

Executive

first with heel and toe weighting

In 1967, the first American-made heel and toe weighted irons were produced. They were Spalding Executives. Since then, many competitors have jumped on the heel-and-toe-weighting bandwagon by redesigning their irons. And most of their irons look it.

Where does all this flurry leave Executive in 1975? Put simply, it leaves Executive the best looking, best playing clubs in the pro shop. Period.

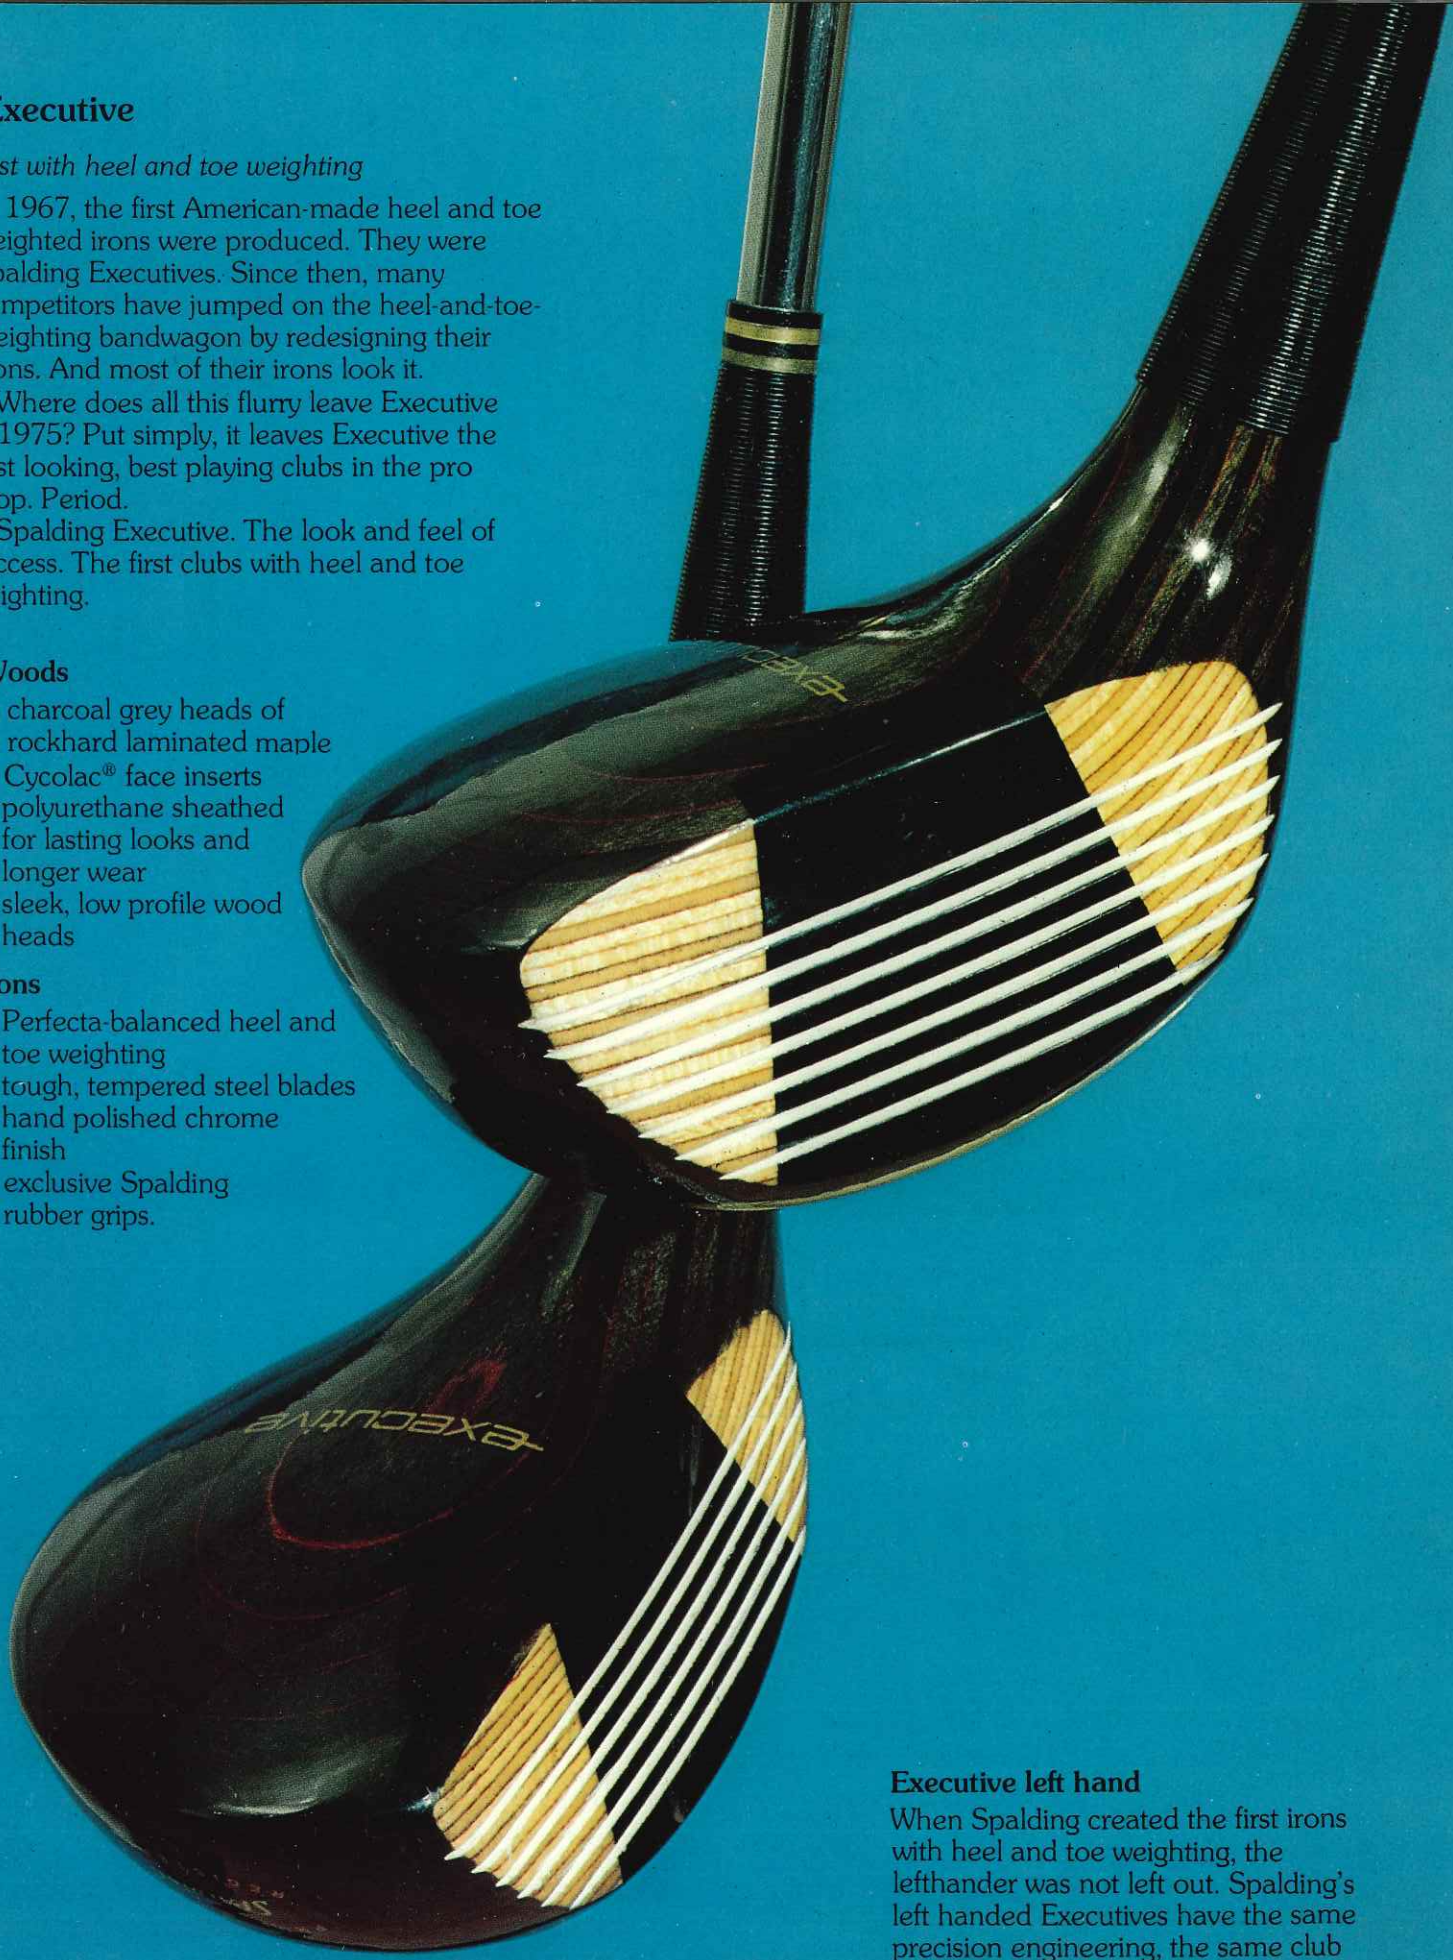
Spalding Executive. The look and feel of success. The first clubs with heel and toe weighting.

Woods

- charcoal grey heads of rockhard laminated maple
- Cycolac® face inserts
- polyurethane sheathed for lasting looks and longer wear
- sleek, low profile wood heads

Irons

- Perfecta-balanced heel and toe weighting
- tough, tempered steel blades
- hand polished chrome finish
- exclusive Spalding rubber grips.



Executive left hand

When Spalding created the first irons with heel and toe weighting, the lefthander was not left out. Spalding's left handed Executives have the same precision engineering, the same club making excellence. Only this time, everything's turned around 180 degrees.

Ladies' Top-Flite

Built-in shot control for Ladies

Spalding's Ladies' Top-Flite. The most built-in shot control any ladies' clubs ever had.

Ladies' Top-Flites have a whole new look for 1975, featuring Spalding's exclusive 3-point Dy-Nertial weighting. A low center of gravity is combined with heel and toe weighting to create the biggest sweet spot ever. In the woods as well as the irons.

Shunning conservative men's styling, this year's Ladies' Top-Flites come alive with bold new cosmetics. Brighter. More colorful. More attractive. More like a woman.

1975 Ladies' Top-Flites. The clubs for girls who are out to beat the men. And look like a lady doing it.

Woods

- 3 point Dy-Nertial weighting in heel, toe and sole
- oversized Cycolac® face insert for larger, more uniform hitting area
- striking Cranberry Royale laminated maple heads
- super-gloss polyurethane finish for lasting good looks
- lightweight steel shafts with exclusive Spalding step pattern

Irons

- 3-point Dy-Nertial weighting in heel, toe and sole
- square toe aids ball alignment
- short hosel gives improved weight distribution
- thin top-line
- compact, perma-finish tempered steel heads, chrome plated and hand polished
- lightweight steel shafts

Leather grips available through Spalding's Custom Built Department.

Sold only through golf professional shops.

Big John

extra firepower and a choice of trajectory

The super-sized driver for the really big hitter. Big John's 10-degree median loft delivers long, sure drives. It has a nine inch vertical roll, making Big John the only driver anywhere that offers you a choice of trajectory. With the wind behind, tee the ball up and hit it higher than usual. Wind in your face? Tee the ball low and get a lower, wind-cheating trajectory.

Big John cuts down on hooks and slices, too, thanks to that nine inch horizontal bulge. The face is a full two inches deep for sure, square tee shots.

Big John comes with its own deluxe knitted head cover, complete with emblem designed especially for the rugged, black laminated maple head.

Lightweight steel shaft and Spalding's exclusive cushion control rubber grip make Big John tops in quality from tip to toe. Available in medium (D2) (D3) and stiff (D3) (D4) shafts.

Big John. The big club for big hitters.

BIG JOHN 2791-01

Sand Wedges

A choice for the skilled shotmaker

Elite Centurion.

- Patterned after the famous "JS" model.
- Medium sized face, rounded blade shape
- Heavy flanged, rolled and cambered sole
- Slight offset 58° loft for versatility on the fairway, in the rough or in the sand

3701-49 (lightweight shaft)
3703-49 (Dynamic® shaft)

Top-Flite.

- A wedge for bunker or rough
- Large face, square blade shape
- Dynertial weighting
- 58° loft

3723-49 (lightweight shaft)
3724-49 (Dynamic shaft)

Executive.

- A traditional wedge preferred by low handicap golfers
- Medium sized face, conventional blade shape
- Heavy flanged sole
- 58° loft

3713-49

Pro-Flite

the value clubs for him

Pro-Flite combo for men.

A beautifully styled set of clubs with all the right professional features. And just the right price tag.

Consider: computer matched clubs with heel and toe weighting in the irons. Never before were such features available in the pro shop at a popular price.

Woods

- Black laminated wood heads
- Lightweight steel shafts
- Tough, red Titanite face insert
- Matched weights
- Professional line Spalding rubber grips

Irons

- Heel and toe weighting
- Lightweight steel shafts
- Matched weights
- Professional line Spalding rubber grips

	Code No.	Set of	Composition	Shaft Material	Flexes and Swing Weights

Auxiliaries	3763-49		Sand Club	Lt. Wt. Steel	

Sold only through golf professional shops.

Sandra Haynie

The value clubs for her

Spalding's Sandra Haynie combo for women—sister clubs to the men's Pro-Flites.

Like Pro-Flite, the Sandra Haynie clubs are computer matched. So every club swings and feels like every other club. Also like Pro-Flites, Sandra Haynies are heel and toe weighted in the irons. So you can get away with some of those off-center hits.

And best of all, Spalding's Sandra Haynies are very affordably priced.

It's the value club that's bringing the girls back to the pro shop.

Woods

- Lightweight steel shafts
- Durable laminated wood heads
- Distinctively feminine Applewood Green stain, polyurethane finish
- Stunning avacado Titanite face inserts
- Precision matched weighting for play-ability across all clubs
- Professional line Spalding rubber grips

Irons

- Heel and toe weighting
- Lightweight steel shafts
- Matched weights
- Professional line Spalding rubber grips

Men's Touring Pro

solid starters for him

The best looking, best playing starter set in the pro shop. Long lasting tempered steel shafts, designed for power and consistency.

Spalding's Touring Pro. Just the right clubs at just the right price for the serious beginner.

Woods

- Persimmonite wood heads
- resists scarring, chipping, dents and moisture absorption
- Spalding's non-slip rubber grips

Irons

- low center of gravity for additional power and ease in getting the ball up
- professional style heads with poly-chrome finish
- Spalding's non-slip rubber grips

	Code No.	Set of	Composition	Shaft Material	Flexes and Swing Weights

	15-7838	11	1, 3, 5 Woods 3-9, P.W. Irons	Steel	Men's

Sold only through golf professional shops

Touring Pro Ms

Stylish starters for her

The same long lasting quality as the men's Touring Pro, but designed for the girls. Consider the smoky blue Cycolac heads. Very sexy. And the shallow-faced driver designed to help a girl get the ball in the air faster. Very functional.

Spalding's Touring Pro Ms. Quality at a price that will be a hit in the pro shop. Color and style that will be a smash on the course.

Woods

- Blue Persimmonite wood heads
- resists scarring, chips, dents and moisture absorption

Irons

- low center of gravity for additional power and loft
- perma-finish chrome plating
- professional style heads with polychrome finish

	Code No.	Set of	Composition	Shaft Material	Flexes and Swing Weights

Sold only through golf professional shops

Bruce Devlin Registered (left hand)

Spalding combines lightweight steel shafts, heel and toe weighted irons, and a selection of swing weights and shaft flexes in both woods and irons to produce the Bruce Devlin golf clubs.

The woods feature a unique power weight design that assures extra distance and greater accuracy shot after shot.

The irons have Spalding's famous heel and toe weighting so you can get away with more of those off center hits.

The serious left hander need look no further.

Woods

- pro-type lightweight steel shafts, medium D2, stiff D3
- power-ply laminated wood heads
- high-power Titanite face inserts
- secure, slip-free rubber grips
- gleaming ebony finish

Irons

- pro-type lightweight steel shafts, medium D2, stiff D3
- heel and toe weighting
- secure, slip-free rubber grips
- enduring Perma-Finish chrome plating

Junior Tournament Combo

For golfers 4' 8" to 5' 4"

Future Pro Combo

For golfers under 4' 8"

Junior Tournament — Shorter clubs for smaller golfers. Junior Tournaments are scaled down to fit the player from 4'8" to 5'4"tall.

Junior Tournaments have been carefully designed with no sacrifice in quality. There is no finer club for the budding golfer.

Combo includes 1 and 3 woods: 3, 5, 7, and 9 irons: putter and bag.

Woods

- tempered steel shafts
- Persimmonite wood heads play like wood but are more resistant to chips and dents

Irons

- tempered steel shafts
- chrome plated, professionally styled iron blades

Future Pro — Quality clubs that feature a shorter shaft and a lighter weight for the smaller youngster just taking up the game. For young golfers 4'8"and under.

Combo includes 1 wood: 5, 7 and 9 irons: putter and bag.

Woods

- tempered steel shafts
- Persimmonite wood heads play like wood but are more resistant to chips and dents

Irons

- tempered steel shafts
- chrome plated, professionally styled iron blades

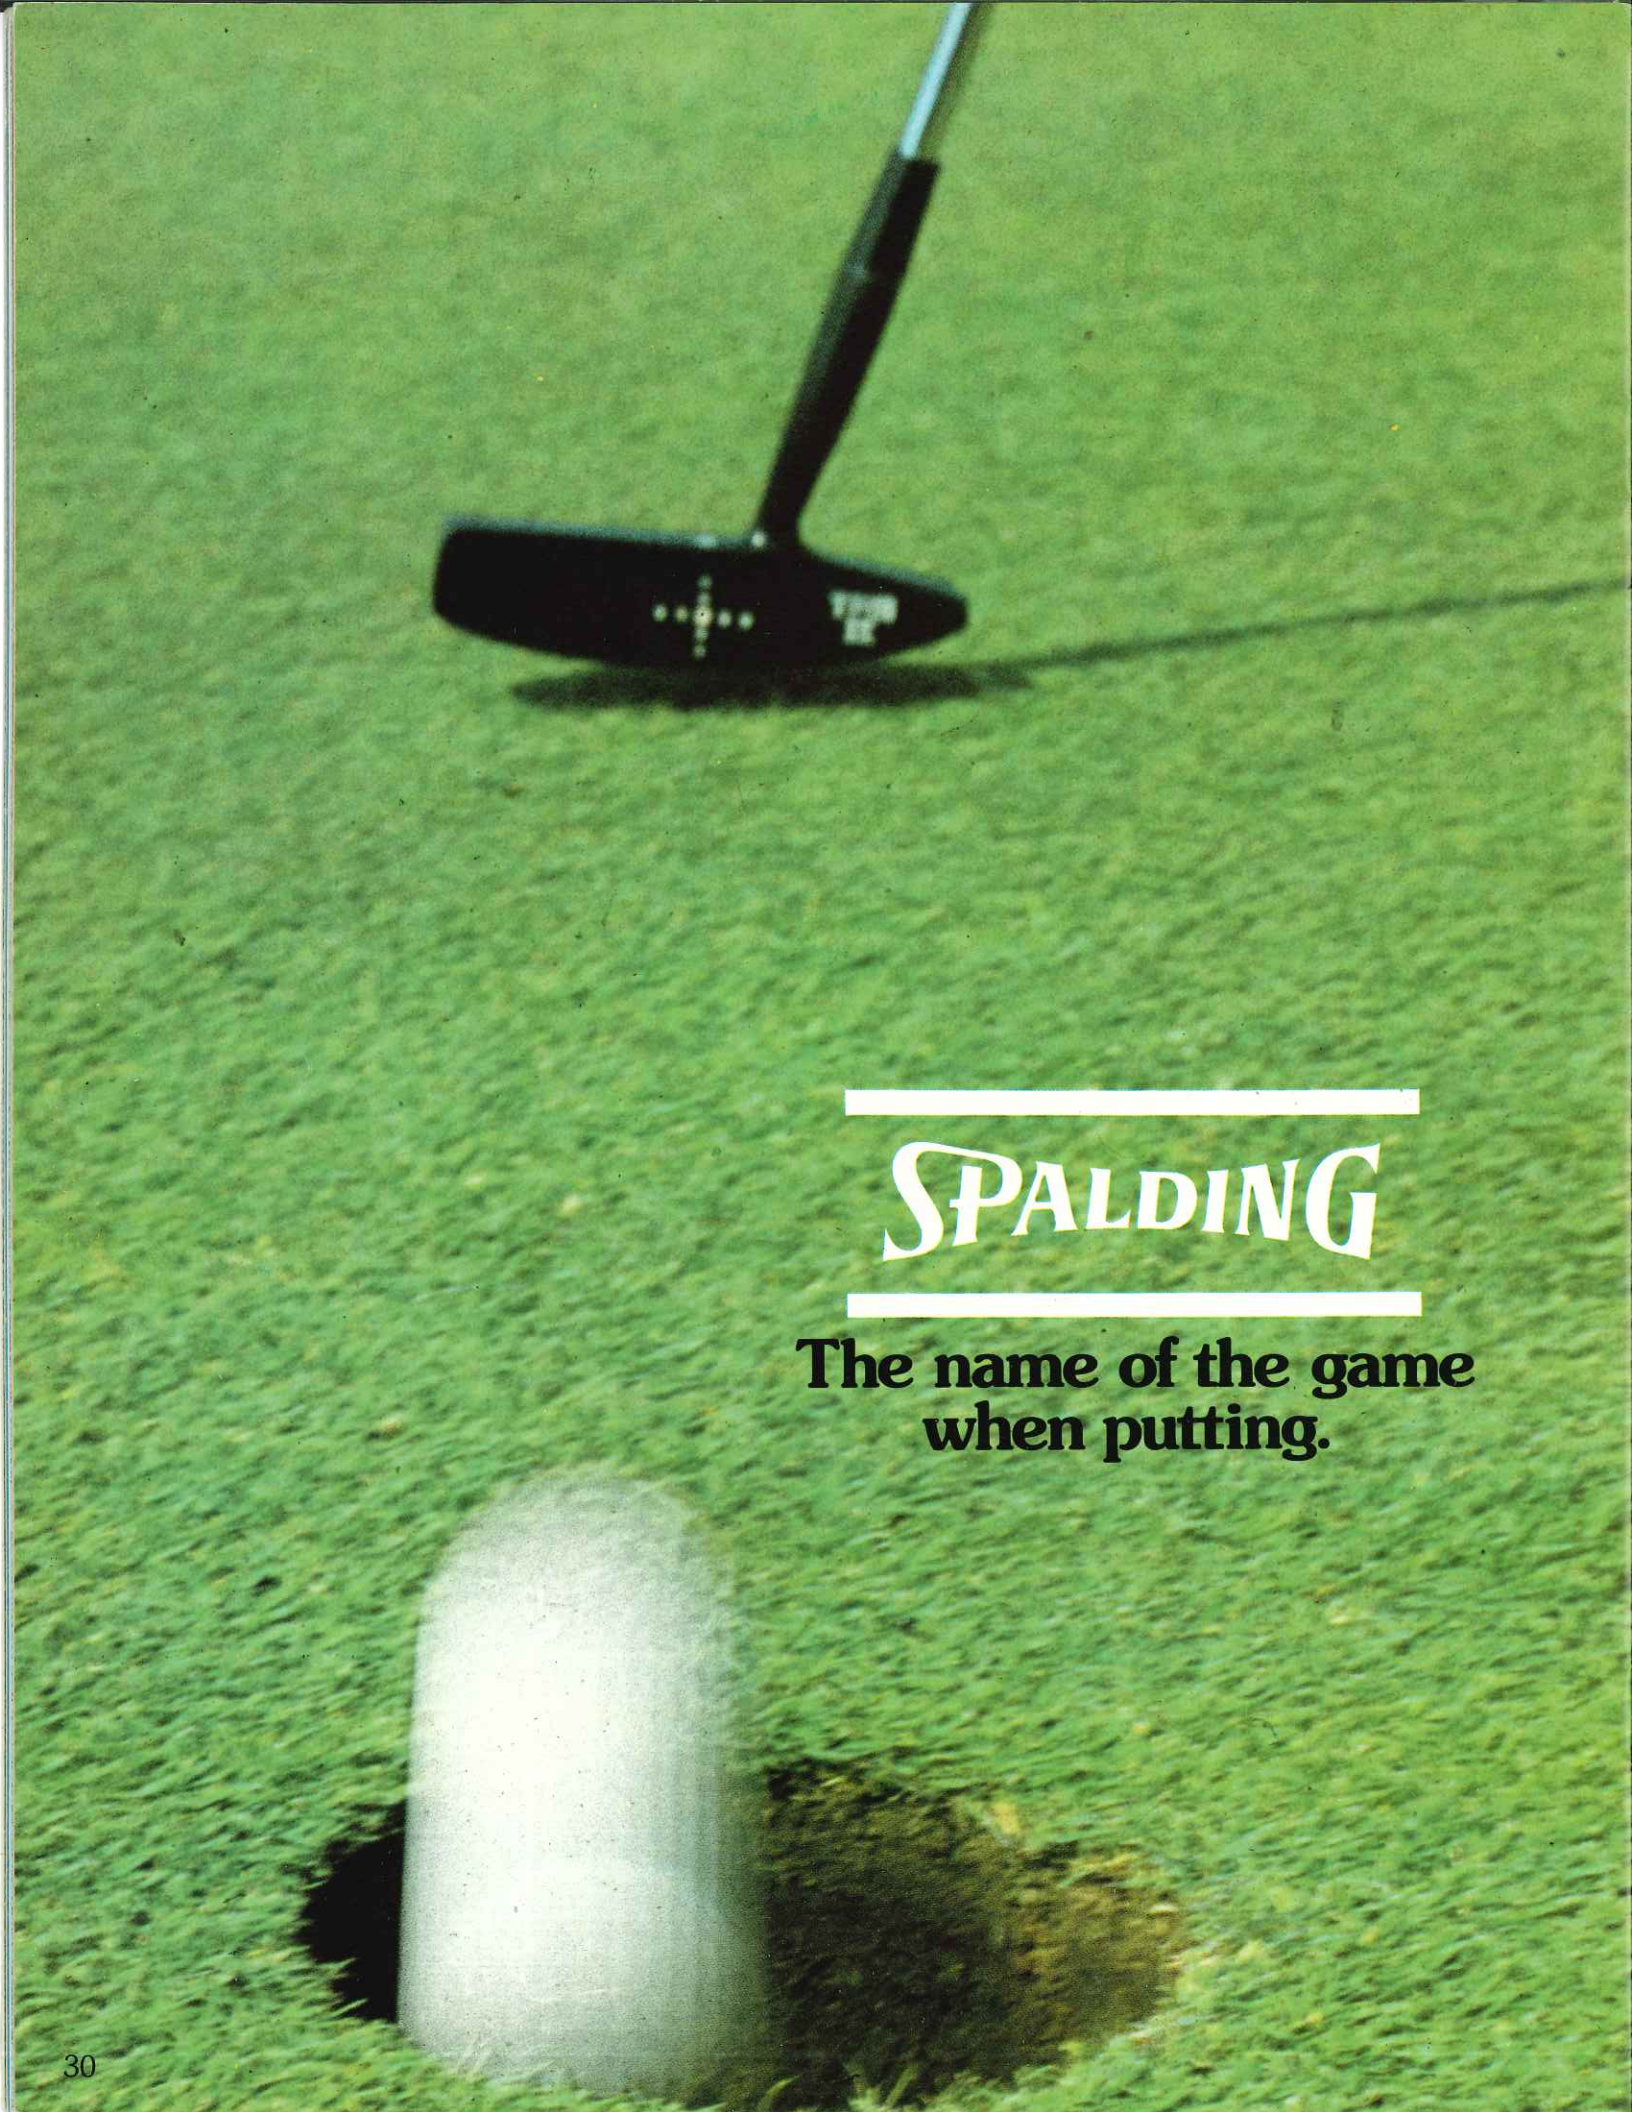
putters



SPALDING
The name of the game
when putting.

TPM Putters

the right touch

Thanks to the two-way curvature rocker sole, slim neck design and straight tapered steel shafts, each TPM putter offers a professional feel. A circle indicator on the top line and a dotted cross at the sweet spot of the blade help maintain consistent feel and touch. For better control, a special brown leather grip.

TPM Model I—Forged steel flanged, long blade. Right hand (34½" shaft) **3191-71**

TPM Model II—Forged steel center-shafted flanged, long blade. Right hand (34½" shaft) **3191-72**

TPM Model III—Investment cast extra heavy flanged blade. Right hand (34½" shaft) **3191-73**

TPM Model IV—Investment cast compact heavy blade. Right hand (34½" shaft) **3191-74**

TPM Model VI—Investment cast center shafted, offset style. Long blade design. Right hand (34½" shaft) **3191-76**

TPM Model VII—Investment cast for right or left-handed use. Center-shafted blade design. Right or left hand (34½" shaft) **3191-77**

TPM Model VIII—Investment cast simulated Walnut back weight inserts. End-shafted design. Mallet style. Right hand (34½" shaft) **3191-78**

TPM Model IX—Investment cast simulated Walnut back weight inserts. Mallet style. Right hand (34½" shaft) **3191-79**

Brass putters

When close won't do, knock it in the front door with a Spalding brushed brass putter. Choose from several solid shapes and styles.

Spalding #66—"Rocker" sole end shaft design. Brushed brass. Contour back weight. Steel shaft. Black rubber grip. **3181-66**

Spalding #88—Center shaft model. Brushed brass. Steel shaft. Black rubber grip. **3181-88**

Spalding #44—Hollow back "tunnel" design. Mallet style. Brushed brass. Steel shaft. Black rubber pistol grip. **3181-44**

Spalding #11—Mallet head. Brushed brass. Circular weight cut-out for enhanced feel. Steel shaft. Black rubber pistol grip. **3181-11**

Same as #11, only one inch shorter shaft for ladies. **3181-99**
